CloudTrail > Trails > Create trail

Step 1  
Choose trail attributes

Step 2  
Choose log events

Step 3  
Review and create

### Choose log events

**Events** [info](#)

Record API activity for individual resources, or for all current and future resources in AWS account. [Additional charges apply](#)

Event type  
Choose the type of events that you want to log.

☒ Management events [info](#) ☒ Data events [info](#) ☒ Insights events [info](#)

Capture management operations performed on your AWS resources. Log the resource operations performed on or within a resource. Identify unusual activity, errors, or user behavior in your account.

**Management events** [info](#)

Management events show information about management operations performed on resources in your AWS account.

☒ No additional charges apply to log management events on this trail because this is your first copy of management events.

API activity  
Choose the activities you want to log.

☒ Read [info](#) ☒ Write [info](#)

☐ Exclude AWS KMS events

☐ Exclude Amazon RDS Data API events

events captured by your trail. [Add+]

▼ Data event: S3 Remove

Data event type  
Choose the source of data events to log.

S3

Log selector template  
Log all events

Selector name - optional  
Enter a name  
1,000 character limit

► JSON view

Add data event type

Insights events [info](#)  
Identify unusual activity, errors, or user behavior in your account. [Additional charges apply](#)

Choose Insights types  
Insights measure unusual activity against a seven-day baseline.

☐ API call rate  
A measurement of write-only management API calls that occur per minute against a baseline API call volume.

☒ API error rate  
A measurement of management API calls that result in error codes. The error is shown if the API call is unsuccessful.
